Ingredients

Thickeners & gelling agents

Viscosifying and suspending natural gum for clear systems.

Substances of seaweeds

Natural texturizing polysaccharide.

A biopolymer coming from renewable materials

A natural water supplier for your skin. It limits transepidermal water loss.

The vegetable hyaluronic acid

Multifunctional polysaccharide complex of vegetal origin.

A multi-power Hyaluronic ACIDS mix

It is a mix of 3 Hyaluronic Acids. One is to reinforce the skin natural defense and wound healing process. The second one is to improve the skin biomechanical properties and firmness, and last but not least, the last one is to rejuvenate the dermis from inside. Hydration, anti-aging and radiance are the main properties.

How to use

Apply to skin with a gentle massage. For daily use.
